WATER DAMAGE GUARD | HOME CARE

Bathroom Cleaning Checklist

A printable routine for an ordinary household bathroom

SAFETY FIRST

Ventilate and read product labels. Never mix bleach with ammonia, acids or other cleaners.
Wear suitable gloves. Use a separate cloth for the toilet. Keep products away from children and pets.
For illness or sewage contamination, follow appropriate disinfection or professional cleanup guidance.

AFTER USE / AS NEEDED

Adjust to the household and surface instructions

- [ ] Wipe splashes from sink, counter and faucet.
- [ ] Ventilate after showers and dry accessible wet surfaces.
- [ ] Hang towels to dry and replace them when needed.
- [ ] Put items back and remove visible debris.

WEEKLY

Use a compatible product for each material

- [ ] Clean the sink, counter and faucet; rinse or dry as directed.
- [ ] Clean the toilet bowl and exterior with separate supplies.
- [ ] Clean the tub, shower walls and fixtures without soaking gaps.
- [ ] Wipe frequently touched handles, switches and surfaces safely.
- [ ] Clean the mirror with a product suitable for the finish.
- [ ] Empty the wastebasket; sweep and clean the floor.
- [ ] Wash towels and reusable cloths as their care labels direct.

MONTHLY / PERIODICALLY

Investigate persistent dampness or damage

- [ ] Check under the sink and around the toilet for drips.
- [ ] Inspect accessible grout and caulk for damage or recurring moisture.
- [ ] Check the exhaust fan and clean its accessible cover as directed.
- [ ] Review supplies and store products in their original containers.

CLEANING AND DISINFECTION ARE DIFFERENT.

When disinfection is needed, use a product labeled for the surface and follow its contact time.
